

Secrets of OpenLab 2™

A WEBINAR SERIES FOR THE BUSY LAB

Is your lab:

Trying to use OpenLab 2 the same way you used older versions?

Still using Excel for calibration calculations?

Still using spreadsheets for final calculations and reports?

Experiencing transcription and other data entry errors?

Hearing auditors complain about manual integration, excessive reprocessing, or other data integrity issues?

Did you know:

There are several new features and workflows that will make your life easier!

Software has always been able to do this for you, and now there are new tools that give you more flexibility.

Intelligent Reporting can replace most spreadsheets and *generate a report in minutes*, not hours!

Some users have seen a 60% reduction in entry errors? Would you like to learn how?

We can help fix all of these issues by showing you how to efficiently use the software!

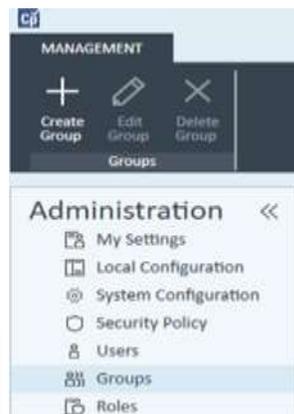

Secrets of OpenLab 2SM is the newest update of our popular *Secrets of ChemStation* series. We now cover the latest version of OpenLab 2 and we have added a new session to cover Intelligent Reporting! In just four sessions your lab can learn about all the major features of the software.

Secrets of OpenLab 2 – Workstation Plus and Client-Server Admin Settings

Outline

- **Overview**
 - **Features**
 - **Changes for ChemStation users**
 - **Program structure**
- **Control Panel Features**
 - **Administration**
 - **Security/Login Options**
 - **File Storage**
 - **Users/Groups/Roles**
- **Projects**
 - **Creating and Configuring**
- **Instruments**
 - **Installing and Configuring**
- **Content Mangement**
 - **Accessing Your Data**
- **Discussion and Demonstration**

Benefits:

- Get a complete overview of the administrative features and settings
- Learn how to configure your authentication settings.
- Understand how to setup users and groups, and how to assign them the appropriate permissions.
- Learn valuable tips and tricks.

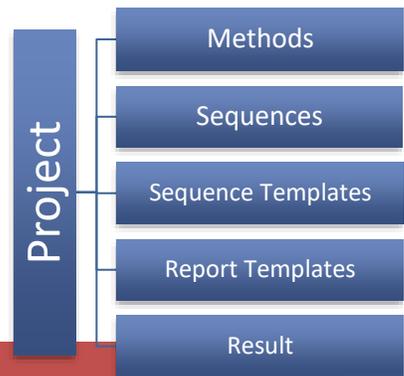

Who should attend?

- Lab supervisors and/or managers
- IT staff who will be overseeing the system

Secrets of OpenLab 2 – Part 1: Program Design and Acquisition

Outline

- **Overview**
 - **Features**
 - **Changes for ChemStation users**
 - **Program structure**
- **Starting OpenLab CDS and Associated Features**
 - **Control Panel**
 - **Acquisition**
 - **Data Analysis**
- **Setting up Acquisition Methods**
- **Migrating ChemStation Methods**
 - **For Acquisition and Data Analysis**
 - **Limitation of method migration**
- **Making Single Injections**
- **Setting Up Sequences**
- **Introduction to Data Analysis**

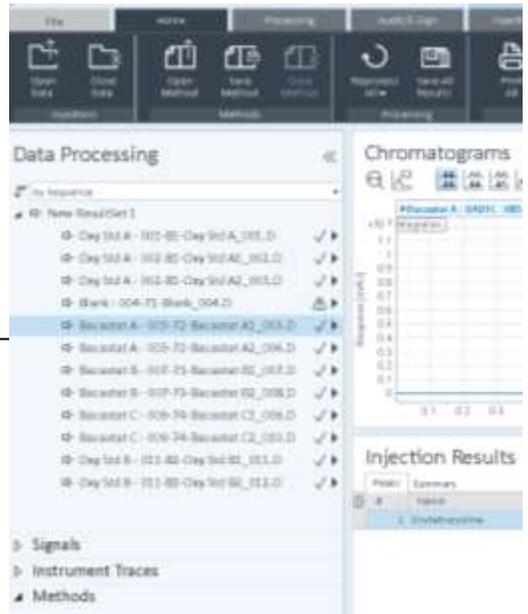

Benefits:

- Get a complete overview of the main components of OpenLab 2, with an emphasis on understanding the main features of each.
- Learn program and data flow.
- Understand how to setup instrument methods.
- Learn valuable tips and tricks.

Who should attend?

- Users switching from ChemStation
- New OpenLab users
- Other users who were never properly trained on any version

Secrets of OpenLab 2 – Part 2: Data Analysis

Outline

- Overview
- Program structure
 - Migrating ChemStation Methods and Data
 - Limitations of data migration
- Editing Processing Methods
 - Integration
 - Calibration
 - Other processing procedures
- General DA Workflow
 - Examples
- Reporting
- Demonstration and Discussion

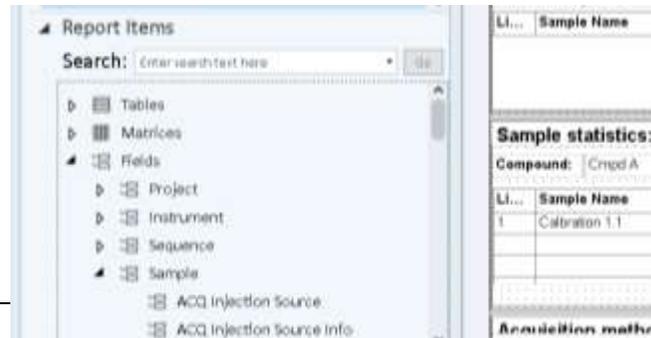

Benefits:

- Eliminate manual integration and save hours of staff time.
- Learn how to setup and configure calibration systems.
- Understand the workflows that will help you effectively process data.

Who should attend?

- Users who want to get more time for productive work by eliminating:
 - Manual integration
 - External spreadsheets for calibration calculations
 - Inefficient workflows

Secrets of OpenLab 2 – Part 3: Introduction to the Intelligent Reporting Template Editor

Outline

- Getting Ready
- Sending Data to the Report Layout View
- General Organization of the Editor Interface
- Template Concepts
- Working with Objects
- Adding Objects
- Modifying Tables to Control What Appears in the Report
- Using Variables and Custom Calculations
- Common Examples
- Suggestions, Tips, and Tricks

Intelligent Reporting templates can reduce your reporting time from hours to minutes (or less). We will get you started on your journey.

Benefits:

- Learn how to get your data ready for creating templates.
- Understand object-oriented programming as it is used here.
- Learn how to add objects and modify them.
- Appreciate how variables can make your template easier to use and more powerful.
- Get practical examples that solve common lab reporting scenarios.

Who should attend:

- Users who want to eliminate their external spreadsheets and save some time.
- Labs who want to customize reports.

Details

Each private webinar provides you with the following:

- Remote Webinar presentation (Webex) for one group at a single listening location
- Two hour maximum for each session
- Includes a live instructor and time for questions
- Copy of slides and recording available at additional cost

Listening site requirements:

- Suitable internet connection at site location, including group voice capabilities by phone or internet
- All listeners must be in the same room

Pricing

Private Webinar <i>Maximum two hours with a live instructor</i>	\$595/session
Copy of presentation slides <i>Optional - pdf format</i>	\$95/session
Recording of presentation <i>Optional – Webex format</i>	\$95/session

- PO required to schedule event.
- Payment terms Net 30
- Discounts for multiple sessions are available

This presentation is available with a lab format option that gives users a directed, hands-on experience with the software. Contact us for details.
